**Subject:** RE: Draft Village HAMP MOA  
**Attachments:** May 25 Revised Draft HAMP MOA JD-BR.DOCX

Afternoon Tim,

Please find the attached comments/suggestions.

As more of a commentary than a suggestion, the main thing that comes off as strange to me about this is how all of the Villages are specified in this in lieu of the Utilities. My perception of this document is that it would more appropriately be executed per PWS (with the exception of Mishongnovi, which should be the Village since they aren't really committed to any PWS at this point). Having Villages as political entities (i.e. in lieu of utility entities) signing this comes off to me as more of a land clearance issue than a rate structure issue based on how we typically interact with Villages with respect to water/sewer O&M. This is especially true for FMCV, which is likely to have one signatory for all involved Villages (while each Village receives funding from the Tribe and has a CSA employed by the Tribe). It's up to the Tribe, but it seems a bit off to me since this somewhat implies that the Villages will each be implementing these rates independently (i.e. especially in FMCV's case) from the PWS that they are currently affiliated with.

Thanks,

Jesse

**Subject:** FW: Draft Village HAMP MOA

Lolma Jesse,

A series of village MOA facilitation meetings resulted in the attached draft MOA.

A resolution is scheduled for Tribal Council Action the first week of June. We anticipate an additional more detailed MOA may be required after final PER approval, final design, regulatory injunction and funding phases of the proposed project. Let us know if IHS has suggestions for this initial step MOA committing villages to the HAMP concept?

Cheers,

Tim 928 401 4000

**Subject:** Draft Village HAMP MOA

Arsenic effected villages,

Thank you for your review and revisions of the attached DRAFT HAMP Memorandum Of Agreement.

Executing a HAMP agreement identifying the Tribe, Village and HPUA responsibilities is required for HAMP planning, re-allocation of expiring USEPA/IHS grant funding, USDA HAMP Grant/Loan application and regulatory recognition that the respective villages are interested in participating in the HAMP project.

Please add additional revision suggestions, request additional HPUA assistance for presentation to your Village or execute the agreement prior to June 7, 2017.

Kwak,kwah.

*Tim*
